

originally-executed copies of an Amendment Transmittal Letter filed herewith. A clean copy of amendments per 37 C.F.R. §1.121 is attached hereto.

Kindly enter the following amendments:

**IN THE CLAIMS:**

Please cancel claims 15-24 without prejudice or disclaimer of the subject matter thereof.

Please amend claims 1, 2, 5, 8 and add new claims 25 and 26 as follows:

1. (Once Amended) A reflection type liquid crystal display, comprising:

*other*  
a pair of substrates disposed opposite to each [other via] with a liquid crystal layer

disposed therebetween;

a plurality of switching elements formed on one surface of at least one of said pair of substrates;

a reflective layer constituted of [the] a same material as a material constituting said

plurality of switching [element] elements and simultaneously formed during formation of said plurality of switching elements; and

<sup>31</sup>  
a transparent pixel <sup>31</sup> electrode formed on said reflective layer via an insulation layer and <sup>26</sup>  
connected to at least one electrode [constituting] included in at least one of plurality of  
switching [element] elements.

2. (Once Amended) The reflection type liquid crystal display according to claim 1, wherein said plurality of switching [element] elements [is] includes at least a thin film transistor, and said reflective layer is formed of the same material as a material of a gate electrode of said thin film transistor and constituted on the same plane as a plane of said gate electrode.

5. (Once Amended) The reflection type liquid crystal display according to claim 1,  
24  
wherein a shielding layer is disposed on an area of said plurality of switching elements.

8. (Once Amended) The reflection type liquid crystal display according to claim 1,  
is formed of  
wherein said reflective layer [is formed] at least one of aluminum [or] and an aluminum alloy.
